1. If you already have an account in CO Train, login www.co.train.org
2. Create an Account at www.co.train.org

Once logged in, you can search by name or Course ID. There are a number of other similar trainings so you need to make sure it is the Colorado Medication Administration trainings. You can also use the included URL (below) but the ID# will help you find the right course.

Colorado Medication Administration Training for Unlicensed Assistive Personnel Full Version Course **including all 4 modules**

- Managing Medications
- Administering Medications
- Asthma
- Allergies

ID#1075373 <https://www.train.org/colorado/course/1075373/compilation>

Medication Administration Training: Emergency Medications

Two SEPARATE courses for emergency medications

- Preventing & Responding to Severe Allergies/Anaphylaxis
- Asthma and Inhaled Medications

ID# 1075447 <https://www.train.org/colorado/course/1075447/compilation>

The courses are designed to produce a certificate after you have completed the post assessment (pass with 80% with 2 tries). The post assessment will show as a notification in several places within in the user record. You will be prompted each time you log in as well.

After you have successfully completed this training, print the certificate and present to your school nurse within 30 days. You will then need to complete a skills portion and receive delegation. In Colorado, **this online training alone does not allow you to administer routine medications in the school setting.** You must demonstrate competency to administer medications to the school nurse, who delegates the task of medication administration.
