

Administering Medications to Students

School personnel shall not administer prescription or nonprescription medications to students unless appropriate administration cannot reasonably be accomplished outside of school hours

Medication may be administered to students by school personnel whom a district registered nurse has trained and delegated the task of administering such medication. For purposes of this policy, the term "medication" includes both prescription medication and nonprescription medication, but does not include medical marijuana.

Student possession, use, distribution, sale or being under the influence of a prescribed medication inconsistent with this policy shall be considered a violation of Board policy concerning drug and alcohol involvement by students and may subject the student to disciplinary consequences, including suspension and/or expulsion, in accordance with applicable Board policy.

The administration of medical marijuana shall be in accordance with the Board's policy on administration of medical marijuana to qualified students.

The term "nonprescription medication" includes but is not limited to over-the-counter medications, homeopathic and herbal medications, vitamins and nutritional supplements.

Medication may be administered to students only when the following requirements are met:

1. Medication shall be in the original properly labeled container. If it is a prescription medication, the student's name, name of the medication, dosage, how often it is to be administered, and name of the prescribing health care practitioner shall be printed on the container.
2. The school shall have received written permission from the student's parent/guardian to administer the medication to the student and written permission to administer the medication from the student's health care practitioner with prescriptive authority under Colorado law.
3. The parent/guardian shall be responsible for providing all medication to be administered to the student.

Self-administration of medication for asthma, allergies or anaphylaxis

A student with asthma, a food allergy, other severe allergies, or a related, life-threatening condition may possess and self-administer medication to treat the student's asthma, food or other allergy, anaphylaxis or related, life-threatening condition. Self-administration of such medication may occur during school hours, at school-sponsored activities, or while in transit to and from school or a school-sponsored activity. Student possession and self-administration of such medication shall be in accordance with the regulation accompanying this policy.

Authorization for a student to possess and self-administer medication to treat the student's asthma, food or other allergy, anaphylaxis or other related, life-threatening condition may be limited or revoked by the school principal or the school nurse after consultation with and the student's parent/guardian if the student demonstrates an inability to responsibly possess and self-administer such medication.

Delta County School District 50J
